### Invited Paper

|                                                |   |
|------------------------------------------------|---|
| A General Framework for Dynamic Networks ..... | 3 |
| <i>Martin Hagan and Orlando De Jesús</i>       |   |

### Neural Networks and Associative Memories

|                                                                                                |    |
|------------------------------------------------------------------------------------------------|----|
| Infinite Dimensional Associative Memories: Foundations<br>(with Theorems) .....                | 15 |
| <i>Enrique Carlos Segura</i>                                                                   |    |
| Genetically Modified GMDH Method with Cloning .....                                            | 29 |
| <i>Marcel Jiřina, Marcel Jiřina, jr.</i>                                                       |    |
| Polynomial Cellular Neural Networks for Implementing<br>Semitotalistic Cellular Automata ..... | 39 |
| <i>Giovanni Egidio Pazienza, Eduardo Gomez-Ramírez<br/>and Xavier Vilasis-Cardona</i>          |    |
| Chaos in a Single Recurrent Artificial Neuron.....                                             | 49 |
| <i>L. Torres-Treviño</i>                                                                       |    |

### Image Processing Applications

|                                                                  |    |
|------------------------------------------------------------------|----|
| Image Retrieval under Image Transformations and Occlusions ..... | 59 |
| <i>Roberto A. Vázquez and Humberto Sossa</i>                     |    |

|                                                                                                            |    |
|------------------------------------------------------------------------------------------------------------|----|
| Cursive Character Recognition by combining Describing Features, Slalom Method and Daubechies Wavelet ..... | 69 |
| <i>L. K. Toscano, J. H. Sossa, R. Barron, G. Sanchez</i>                                                   |    |

|                                                                              |    |
|------------------------------------------------------------------------------|----|
| Cluster Tree Self Organizing Map for Developing Image Retrieval System ..... | 81 |
| <i>Hamed Shahbazi, Mohsen Soryani, Nasser Mozayani and Mahmood Fathy</i>     |    |

## Feature Extraction and Dimensionality Reduction

|                                                                                                  |     |
|--------------------------------------------------------------------------------------------------|-----|
| Using Testor Theory to Reduce the Dimension of Neural Network Models .....                       | 93  |
| <i>Roberto A. Vázquez and Salvador Godoy-Calderón</i>                                            |     |
| Feature Extraction using Gabor and DWT for GMM based Face Verification Algorithms .....          | 105 |
| <i>Jesus Olivares-Mercado, Gabriel Sanchez-Perez, Mariko Nakano-Miyatake, Hector Perez-Meana</i> |     |
| Perceptron for Feature Selection .....                                                           | 115 |
| <i>Manuel Mejía-Lavalle and Enrique Sucar</i>                                                    |     |
| A Modified Bottleneck Neural Network for Dimensionality Reduction.....                           | 127 |
| <i>Eduardo Filemón Vázquez Santacruz, Debrup Chakraborty</i>                                     |     |

## Real World Applications

|                                                                                                                         |     |
|-------------------------------------------------------------------------------------------------------------------------|-----|
| Multiple Fault Diagnosis in Electrical Power Systems with Dynamic Load Changes using Probabilistic Neural Networks..... | 139 |
| <i>Juan Pablo Nieto González, Luis E. Garza Castañon, Rubén Morales Menendez</i>                                        |     |
| Improving Under Sampling with Neural Networks for Class Imbalance Problem .....                                         | 151 |
| <i>Man-Sun Kim</i>                                                                                                      |     |

|                                                                                                          |     |
|----------------------------------------------------------------------------------------------------------|-----|
| Closing Price Prediction for Auctions of Hotel Rooms on<br>the TAC Classic .....                         | 161 |
| <i>Eber Jair Flores Andonegui, Darnes Vilariño Ayala,<br/>Fabiola López y López</i>                      |     |
| Reinforcement Learning based Neurocontrollers .....                                                      | 173 |
| <i>Erik Cuevas, Daniel Zaldivar, Marco Perez and Raúl Rojas</i>                                          |     |
| Direct Adaptive Vector Neural Control of a Three Phase<br>Induction Motor .....                          | 183 |
| <i>Ieroham S. Baruch, Carlos R. Mariaca-Gaspar and<br/>Irving P. de la Cruz</i>                          |     |
| Fault Diagnosis in Power Transmission Networks using<br>Bayesian Networks .....                          | 193 |
| <i>Luis E. Garza and Geovanna Ruffo</i>                                                                  |     |
| An Indirect Adaptive Neural Control of a Wastewater Treatment<br>Bioprocess via Marquardt Learning ..... | 203 |
| <i>Carlos R. Mariaca-Gaspar, and Ieroham S. Baruch</i>                                                   |     |
| The Simulation Model of Highpressure, Suspension Waterjet<br>Cutting Process of Marble .....             | 215 |
| <i>Andrzej Perec</i>                                                                                     |     |
| Induction Learning Techniques Applied to Bayesian Networks<br>Optimization .....                         | 225 |
| <i>P. Britos, P. Felgaer, D. Rodríguez and R. García-Martínez</i>                                        |     |
