

This volume contains 31 carefully selected papers by 97 authors from seven countries: Belgium, France, Republic of Korea, Mexico, Spain, United Kingdom and Venezuela. These papers present the most recent developments in a range of areas related to computer science and engineering. The papers are arranged into 9 thematic fields:

- Algorithm Theory,
- Natural Language Processing and Knowledge Representation,
- Pattern Recognition and Data Mining,
- Computer Vision,
- Multi-agent Systems and Simulation,
- Computer Networks,
- Digital Signal Processing,
- Computer Architecture and Digital Systems Design,
- Fuzzy Logic and Control

The volume will be useful for researchers, students, and general public interested in the corresponding areas of computer science and engineering.
