|                                                                                                                                                  |    |
|--------------------------------------------------------------------------------------------------------------------------------------------------|----|
| Storyline for Adaptive Learning Virtual Environment (SALVE) .....                                                                                | 1  |
| <i>Frederic Kleiner mann, Jordi Ribera</i>                                                                                                       |    |
| Clustering for Virtual Environments Using Open Source Tools .....                                                                                | 14 |
| <i>Felipe Gómez-Caballero, Carlos Delgado-Mata, Jesús Ibañez</i>                                                                                 |    |
| Developing a Virtual Environment for Learning Geometry .....                                                                                     | 26 |
| <i>Venustiano Soancatl, María-Luisa Cruz, Luis Huerta, Antonio León, Andrea Herrera, Lucina Torres, William Zurita, Inti Reyes</i>               |    |
| Adaptive Physics for Game-balancing in Videogames .....                                                                                          | 37 |
| <i>Carlos Delgado-Mata, Jesús Ibañez, Alfredo Villalobos</i>                                                                                     |    |
| Low Cost Technologies for Measuring the Psychomotor Coordination in Children from 7 to 11 Years .....                                            | 47 |
| <i>Ricardo Ruvalcaba Manzano, Carlos Delgado-Mata, Jesús Ibañez</i>                                                                              |    |
| Development process for educational games .....                                                                                                  | 56 |
| <i>Andrea Herrera, Lucina Torres, Inti Reyes, William Zurita, Venustiano Soancatl, María-Luisa Cruz, Luis Huerta, Antonio León</i>               |    |
| Is M-marketing an Accessible Technology for Consumers with Visual Disabilities? - A Preliminary Study .....                                      | 67 |
| <i>Rafael Martínez-Peláez, Alejandro Bautista Mendoza, Daniel Cortes Morales, Cristina Satizábal, Oswaldo Ávila Barrón, Darío Barragán López</i> |    |
| Setting the iOS mobile platform for visual servoing applications .....                                                                           | 77 |
| <i>Marco Perez-Cisneros, Sabrina Vega-Maldonado, Erik Cuevas, Daniel Zaldivar, Patricia Sanchez-Rosario</i>                                      |    |
| Developing visual servoing applications over the Windows7 mobile platform .....                                                                  | 87 |
| <i>Marco Perez Cisneros, Laura Lopez-Lopez, Erik Cuevas, Daniel Zaldivar, Marco Cedano-Olvera</i>                                                |    |
| Ambient Intelligence Application of Bayesian Networks in a Home Security System .....                                                            | 97 |
| <i>Gustavo López, Ramon Brena</i>                                                                                                                |    |

|                                                                                                                                                                                                                                                |     |
|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----|
| Remote Authentication Scheme Using Smart Cards and Fingerprint Technology.....                                                                                                                                                                 | 107 |
| <i>Rafael Martínez-Peláez, Cristina Satizábal, Darío Barragán López, Edgar Aquino García, Oswaldo Ávila Barrón</i>                                                                                                                             |     |
| Modeling PMx Trends Contaminants by using Support Vector Machines.....                                                                                                                                                                         | 114 |
| <i>Artemio Sotomayor-Olmedo, Marco Aceves-Fernández, Efrén Gorrostieta-Hurtado, Carlos Pedraza-Ortega, Emilio Vargas-Soto, Ruth Rico-Hernández</i>                                                                                             |     |
| Intelligent Decision Support System based on Data Mining.....                                                                                                                                                                                  | 123 |
| <i>Alberto Ochoa-Zezzatti, Sergio Enriquez, Arturo Elías, Rubén Jaramillo, Ricardo Pérez, Alfredo Jiménez, Ángeles Duhart, Cynthia Araiza</i>                                                                                                  |     |
| A Reputation Scheme for Peer-to-Peer Media Streaming.....                                                                                                                                                                                      | 132 |
| <i>Francisco de Asís López-Fuentes</i>                                                                                                                                                                                                         |     |
| Heuristic for the Assignment of Tasks in a Real-time Distributed Environment .....                                                                                                                                                             | 142 |
| <i>Luis Alberto Gutiérrez Díaz de León, Carlos Alberto Franco Reboreda, Carlos Adrián Gutiérrez Díaz de León</i>                                                                                                                               |     |
| A Bandwidth Sharing Method under Node Autonomy and Short-Term Protection for QoS .....                                                                                                                                                         | 155 |
| <i>Alfredo P. Mateos-Papis</i>                                                                                                                                                                                                                 |     |
| Modeling information repositories consistency and auditing through Alloy and Ccalc.....                                                                                                                                                        | 169 |
| <i>Hector G. Ceballos, Ramon F. Brena , Francisco J. Cantu</i>                                                                                                                                                                                 |     |
| An Aspect Oriented Approach for the Synchronization of Instance Repositories in Model-Driven Environments.....                                                                                                                                 | 179 |
| <i>Juan Castrejón</i>                                                                                                                                                                                                                          |     |
| Comparison between phase unwrapping algorithms for depth estimation in 1-D Wavelet Profilometry.....                                                                                                                                           | 190 |
| <i>Jesús Carlos Pedraza-Ortega, Efrén Gorrostieta-Hurtado, Emilio Vargas-Soto, Juan Manuel Ramos-Arreguín, Marco Aceves-Fernández, Carlos Alberto Olmos-Trejo, Sandra Luz Canchola-Magdaleno, Saúl Tovar-Arriaga, Artemio Sotomayor-Olmedo</i> |     |
| A review on Enterprise Resource Planning system selection process.....                                                                                                                                                                         | 204 |
| <i>Augusto A Pacheco-Comer, Juan C. González-Castolo</i>                                                                                                                                                                                       |     |

## Electronic Systems

|                                                                                                                                              |     |
|----------------------------------------------------------------------------------------------------------------------------------------------|-----|
| A Comparison of Responses of Voltage Propagation in Transmission Lines<br>Using Wave Digital Filters Simulation .....                        | 215 |
| <i>Jesús García-Guzmán, Farah Helúe Villa-López, Alfredo Ramírez-Ramírez</i>                                                                 |     |
| On the stability of a RLC parametric oscillator .....                                                                                        | 226 |
| <i>Luis Moreno-Ahedo, Marisol Prado, Roberto Carmona, Armando Aguayo</i>                                                                     |     |
| Development and Implementation of a Two Channel System to Measure the<br>Response of Quartz Crystal Resonator Gas Sensors using an FPGA..... | 235 |
| <i>José Lorenzo Muñoz-Mata, Severino Muñoz-Aguirre, Humberto González-Santos, Georgina Beltrán-Pérez, Juan Castillo-Mixcóatl</i>             |     |
| Hybrid Routing Protocol for Wireless Ad-Hoc Networks.....                                                                                    | 245 |
| <i>Aldo Méndez, Marco Panduro, Omar Elizarraras, Manuel Munguia Macario</i>                                                                  |     |
| Performance of the IEEE 802.15.4a access protocol under preamble-based<br>clear channel assessment .....                                     | 255 |
| <i>Paul Medina, Jaime Sánchez, José-Rosario Gallardo</i>                                                                                     |     |
| Real-Time Communication Protocol for Broadcast Based Networks.....                                                                           | 265 |
| <i>Carlos Franco, Luis Gutiérrez, Raúl Jacinto</i>                                                                                           |     |
| Design of Multi-beam Circular Antenna Arrays using CORPS and Differential<br>Evolution.....                                                  | 276 |
| <i>Marco A. Panduro, Aldo Méndez, Leopoldo Garza</i>                                                                                         |     |
| Near Optimal Antenna Selection Model for MIMO Systems .....                                                                                  | 286 |
| <i>Rafael Aguilar González, Ulises Pineda Rico, Enrique Stevens-Navarro, Juan Francisco Castillo León</i>                                    |     |
| Coverage Maps of 3G Cellular Networks using Geographic Information<br>Systems .....                                                          | 297 |
| <i>Jazmín Ponce Rojas, Sergio Vidal-Beltrán, Iván Zamudio Castro, Federico Felipe Durán</i>                                                  |     |
| Complexity improved Sphere Decoder for Highly Correlated and LOS<br>channels.....                                                            | 308 |
| <i>Juan Francisco Castillo León, Rafael Aguilar González, Ulises Pineda Rico, Enrique Stevens-Navarro</i>                                    |     |
| Analysis of Plasma Loop Antenna with Uniform and Nonuniform Distribution .....                                                               | 317 |
| <i>Fatemeh Etesami, Farzad Mohajeri</i>                                                                                                      |     |

|                                                                                                                                                                                                                                 |     |
